

NEW GENERA.

BY G. M. MATHEWS.

p. 33. ALPHAPUFFINUS gen. nov. Type *Puffinus assimilis* Gould.

Differs from *Puffinus* Brisson in having a different shaped bill, being much thinner and the nostrils more open.

p. 267. From material supplied by Dr. J. Burton Cleland, I find that *Gliciphila melanops* differs generically from *Gliciphila albifrons* of my List of the Birds of Australia, pp. 266-267. I therefore introduce—

PURNELLA genus nov. Type *Gliciphila albifrons* Gould.

Differs from *Gliciphila* Swainson in having a fleshy caruncle on the posterior canthus of the eye, of a deep pinkish flesh-colour. Named in honour of my friend Herbert A. Purnell, of Geelong.

p. 273. I would note that under the rules adopted by the American Ornithological Union the genus name *Meliphaga* Lewin, 1808, is invalidated by the prior *Melophagus* of Latreille in Sonnini's Buffon Ins., Vol. III., p. 466, 1802. I introduce—

DOROTHINA nom. nov. Type *Meliphaga lewini* Swainson.

Dorothina lewini lewini.
